

IPO Radar AI — Page Tree and Wireframe Specification

Author: Manus AI **Date:** April 4, 2026 **Version:** 1.0

I. Introduction

This document defines the complete page tree (information architecture) and wireframe specifications for IPO Radar AI. The goal is to establish a clear, logical navigation structure that supports the product’s core use cases: discovering upcoming IPOs, researching individual companies, tracking filing amendments, and consuming AI-generated intelligence reports. The platform is entirely self-service — there are no demo-booking or sales-assisted flows.

II. Page Tree (Site Map)

The following table presents the complete page hierarchy. Each page is assigned a unique identifier for cross-referencing in wireframe descriptions. Pages marked as “Auth Required” require the user to be logged in.

III. Navigation Structure

Primary Navigation (Top Bar — All Pages)

The top navigation bar is persistent across all pages. It adapts based on authentication state.

Unauthenticated:

Position	Element	Action
Left	Logo + “IPO Radar AI”	Links to Home (P-01)
Center	Product, Browse IPOs, Calendar, Sectors, Pricing	Links to P-17, P-02, P-06, P-07, P-16
Right	Search icon	Opens search overlay → P-10
Right	Log in	Links to P-15
Right	“Get Started” (primary button)	Links to P-15

Authenticated:

Position	Element	Action
Left	Logo + “IPO Radar AI”	Links to Home (P-01)
Center	Browse IPOs, Calendar, Sectors, Digest	Links to P-02, P-06, P-07, P-09
Right	Search icon	Opens search overlay → P-10
Right	Bell icon (notifications)	Opens notifications dropdown
Right	User avatar	Opens dropdown: Dashboard, Watchlist, Settings, Log out

Dashboard Sidebar Navigation (P-11 through P-14)

The user dashboard uses a left sidebar layout for internal navigation.

Icon	Label	Route
LayoutDashboard	Overview	/dashboard
Star	Watchlist	/dashboard/watchlist
Bell	Alerts	/dashboard/alerts
Settings	Settings	/dashboard/settings

IV. Wireframe Specifications

Each wireframe is described in terms of layout regions, content blocks, and interactive elements. The design language follows the established “Dark Terminal Luxe” aesthetic: dark charcoal base, slate card surfaces, teal primary accent, DM Sans headings, JetBrains Mono for financial data.

P-01: Landing / Home Page

Purpose: Convert visitors into users by demonstrating immediate value with live IPO data.

Layout (top to bottom):

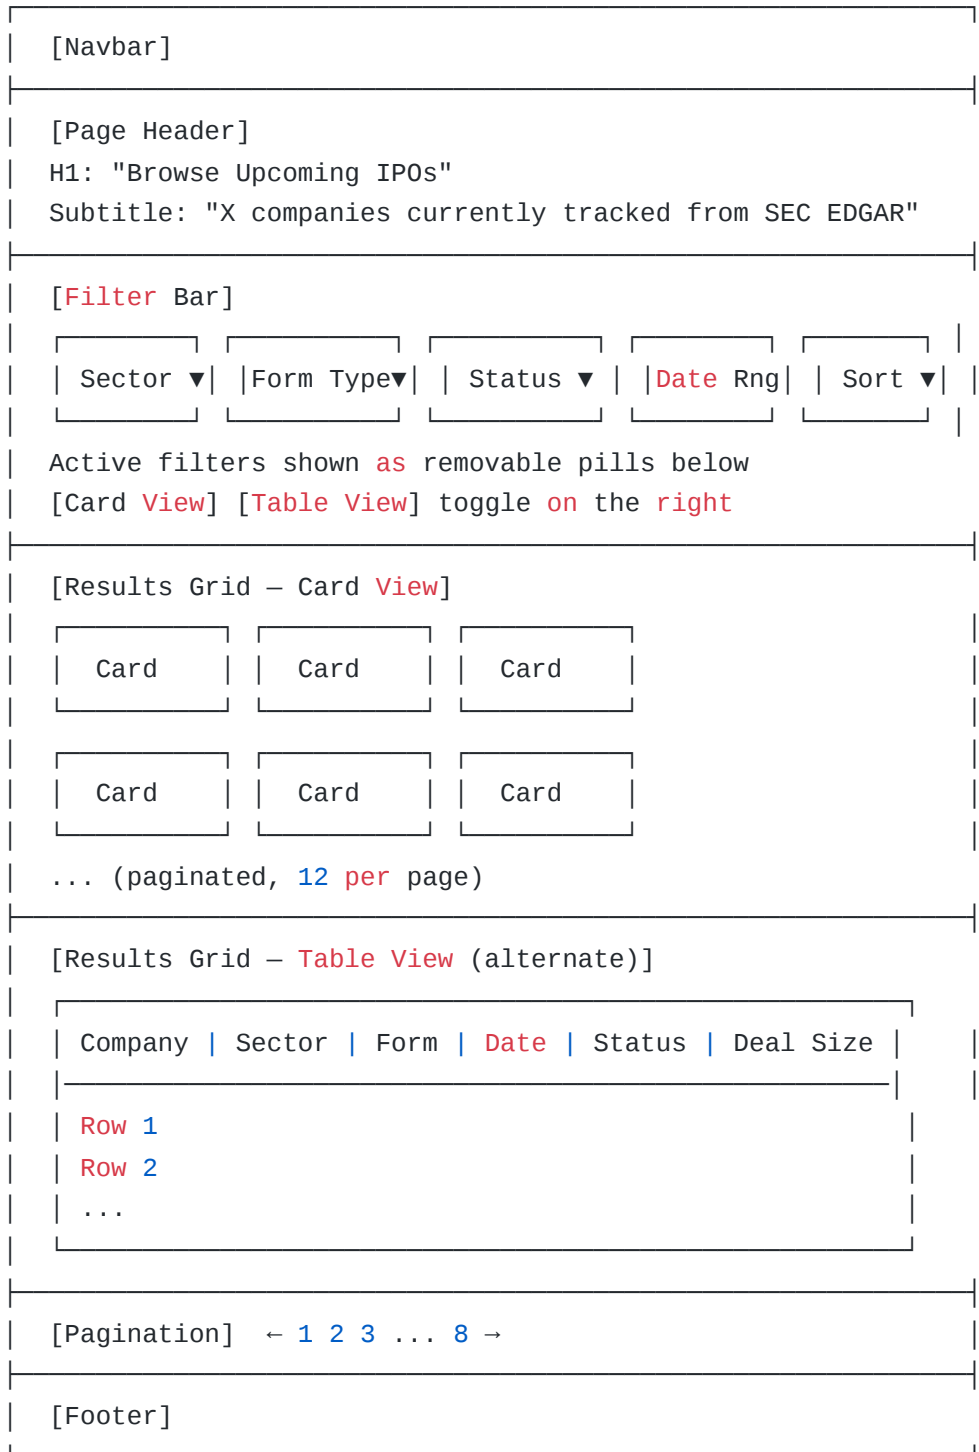

[illegible]

Status: Built and functional.

P-02: IPO Discovery (Browse All)

Purpose: Full browsable, filterable, and searchable listing of all tracked IPO filings. This is the “Airbnb search results” equivalent — where users go to explore beyond the homepage highlights.

Layout:

Filter Options:

Filter	Type	Options
Sector	Multi-select dropdown	Technology, Healthcare, Energy, Financial Services, Consumer, Industrial, etc.
Form Type	Multi-select dropdown	S-1 (Domestic), F-1 (Foreign), S-1/A (Amendment), F-1/A (Amendment)
Status	Single-select	All, New Filing, Amended, Priced
Date Range	Date picker	Last 7 days, Last 30 days, Last 90 days, Custom
Sort	Single-select	Most Recent, Alphabetical, Sector

Table View Columns:

Column	Width	Format
Company Name	25%	Text, linked to P-03
Sector	15%	Color-coded pill
Form Type	10%	Badge (S-1, F-1, etc.)
Filing Date	12%	YYYY-MM-DD, monospaced
Status	10%	Color-coded badge
Location	15%	City, State/Country
Action	13%	“View Details” link → P-03

P-03: IPO Detail Page

Purpose: Comprehensive research destination for a single company’s IPO filing. Consolidates all available intelligence into a structured, scannable layout.

V. User Flow Diagrams

Flow 1: New Visitor Discovery Journey

Flow 2: Returning User Research Workflow

VI. Responsive Breakpoints

All pages follow a consistent responsive strategy:

Breakpoint	Width	Layout Adjustments
Mobile	< 640px	Single column. Cards stack vertically. Sidebar content moves below main content. Navigation collapses to hamburger menu.
Tablet	640px – 1024px	Two-column card grids. Sidebar may overlay or collapse. Full navigation visible.
Desktop	> 1024px	Three-column card grids. Full two-column layout with sidebar. All navigation visible.

VII. Priority Implementation Order

Based on user value and technical dependencies, the recommended build order is:

Priority	Page	Rationale
1	P-02: IPO Discovery	Extends the homepage grid into a full browsable experience with filters
2	P-06: IPO Calendar	High-value visual feature, uses existing filing date data
3	P-05: AI First-Look Report	Key differentiator, requires LLM integration
4	P-15: Login / Sign Up	Prerequisite for dashboard, watchlists, and alerts
5	P-11: User Dashboard	Personalized experience for returning users
6	P-12: Watchlist	Core engagement feature for authenticated users
7	P-04: Filing Diff Viewer	Advanced feature, requires amendment parsing
8	P-07/P-08: Sectors	Aggregation view, uses existing sector data
9	P-13: Alerts	Requires notification infrastructure
10	P-16: Pricing	Needed before monetization
11	P-09: Weekly Digest	Content marketing feature
12	P-14: Account Settings	Standard CRUD, low priority
13	P-17–P-19: Static Pages	Legal/marketing, can be added anytime
